

Community Health Needs Assessment

SANFORD MEDICAL CENTER FARGO
2022-2024

Dear Community Members,

Sanford Fargo is pleased to present the Community Health Needs Assessment (CHNA). Sanford Health completes a community health needs assessment every three years. It is through this work that we identify unmet health needs in the community, and then strategically plan how to best address those needs. This process is well aligned with Sanford's vision to improve the human condition.

From December 2020 to February 2021, members of the community were invited to complete a survey to help identify unmet health needs across a range of social determinants of health. Sanford Health and the NDSU Center for Social Research partnered to analyze the data from the primary research along with key secondary data points from County Health Rankings. Sanford also facilitated discussions with key stakeholders in each community to prioritize the identified needs.

As a result of this process, we will address the following health needs in a formalized implementation strategy for the 2022-2024 time period:

- Access to Affordable Health Care
- Mental Health / Behavioral Health and Substance Abuse

The CHNA process also focused on the many strengths and resources available in our community. This report includes an overview of the community assets that are available to address various community health needs. We have also included an impact report from our 2019 implementation strategies.

We are committed to extending care beyond our bricks and mortar, and ultimately improving the health and wellness of our entire community. We are committed to improving the quality of life for all Fargo area residents. We invite you to join us and thank you for your support of these ongoing efforts.

Sincerely,

Bryan Nermoe

President and Chief Executive Officer – Fargo Medical Center

BACKGROUND

Community Description

The Sanford Fargo Medical Center is located in Fargo, North Dakota. Fargo is a diverse, dynamic, family-oriented community on the eastern border of North Dakota. It is the largest city in North Dakota, accounting for nearly 16 percent of the state population. Fargo is the county seat of Cass County. Fargo and its twin city of Moorhead, MN, adjacent West Fargo, ND, and Dilworth, MN, form the core of the metro area, which in 2018 had a population of 240,000.

Founded in 1871, Fargo is the economic center of southeastern North Dakota. It is a culture, retail, health care, education, and industry hub for the region. The Fargo-Moorhead metro area is home to three universities: North Dakota State University, Concordia College, Minnesota State University Moorhead, and numerous other private and state colleges and technical schools and is home to over 38,000 students.

Although the economy of the Fargo area has historically been dependent on agriculture, the city now has a growing economy based on food processing, manufacturing, technology, retail trade, higher education, and health care. US News & World Report ranked Fargo as the #1 city for finding a job, Farmers Insurance named it the #3 most secure place to live, and Moving.com named it #5 on its list of best places to live in America.

Fargo-Moorhead is home to a growing number of innovative technology and biomedical companies, attracted to the community by its educated workforce, low labor costs, favorable tax climate, advanced telecommunications infrastructure and available energy and water supplies. Education and health services account for the largest non-agricultural industries.

The community as defined for purposes of the Community Health Needs Assessment includes Cass County, ND, and Clay County, MN. Demographic detail for the counties is included in the appendix.

Partners

The Community Health Needs Assessment is the result of the hard work and coordination of numerous people within the organization and among community partners. Sanford Health would like to thank and acknowledge the following for their assistance. The development of the program would not have been possible without their expertise regarding the communities and populations we serve.

Sanford Health

- Michelle Micka, System Vice President, Finance, Health Services
- Dr. Jeremy Cauwels, System Vice President, Chief Physician
- Corey Brown, System Vice President, Government Affairs
- Clarence Mellang, Senior Director, Communications
- Michelle Bruhn, Senior Vice President, Health Services Operations
- Blayne Hagen, Executive Director, Legal
- Stacy Wrightsman, Executive Director, Community Relations
- Matt Ditmanson, Director, Community Benefit Programs
- Emily Griese, Vice President, Population Health and Clinical Operations
- Marnie Walth, Senior Legislative Affairs Specialist
- Joseph Beaudreau, Patient Relations Specialist and Indian Health Advocate
- Phil Clark, Director, Market Research
- Shawn Tronier, Senior Marketing Analyst
- Amber Langner, Vice President, Treasury
- Catherine Bernard, Director, Tax
- Deana Caron, Senior Tax Accountant

System Partners

We would also like to express our gratitude to the following individuals for their expertise during the development and analysis of the Community Health Needs Assessment:

- Jeanne Larson, Executive Director, Northern Dental Access Center
- Carol Biren, Division Director, Southwest Health and Human Services
- Cynthia Borgen, Director, Beltrami County Public Health
- Mary Michaels, Public Health Prevention Coordinator, Sioux Falls Department of Health
- Renae Moch, Director, Burleigh Public Health and President, North Dakota Public Health Association
- Ann Kinney, Senior Research Scientist, Minnesota Department of Health
- Jennifer Nelson, Public Health Educator, Southwest Health and Human Services
- Julie Ward, Vice President of Strategy and Social Innovation, Avera Health
- Jody Lien, Director, Ottertail Public Health
- Karen Pifher, Community Health Program Manager, Essentia Health
- Lori Jensen, Public Health Nurse, Beltrami County Health and Human Services
- Erica Solseth, CHI St. Alexius Health
- Sister Nancy Miller, Director Mission Integration, CHI St. Alexius Health
- Nancy Hodur, Director, North Dakota State University Center for Social Research
- Karen Olson, Research Specialist, North Dakota State University Center for Social Research

Fargo Partners

We express our gratitude to the following community collaborative members for their participation in the community stakeholder meetings:

Julie Sorby, Family HealthCare
Jayne Gust, Sanford Health
Megan Jensen, United Way
Kyle Christianson, The Lotus Center
Jode Freyholtz-London, Wellness in the Woods
Clare Holland, Family HealthCare
Bridget Henne, Fargo Cass Public Health
Ellen Robinsetin, NDSU
Michael Little, ND Dental Foundation & Optometric Foundation of ND
Jamie Hennen, Clay County Public Health
Kelsie Tucholke, Clay County Public Health
Lonnie Pederson, Jeremiah Program
John Rudrud, Sanford Health
Kane Tigner, Sanford Health
Joshua Ebert, Clay County Public Health
Ahmed Shiil, United Way
Rory Biel, Clay County Public Health
Karen Pifher, Essentia Health
Leslie Witte, Clay County Public Health

Joined Virtually:

Anna Frissell, Red River Child Advocacy Center
Buboltz, Jackie, Essentia Health
Shannon Monroe, Moorhead Police Department

Ken Foster, Concordia College
Tim Hiller, Churches United
Hollie Mackey, Indigenous Association
Kaleb Liebl, Family HealthCare
Erika Yoney, Moorhead Area Public Schools
Arlette Preston, City of Fargo
Kim Seeb, Family HealthCare
Maeve Williams, Fargo Cass Public Health
Beth Nelson, Blue Cross Blue Shield of Minnesota
Kathy McKay, Clay County Public Health
Kim Lipetzky, Fargo Cass Public Health
Nyamal Dei, Clay County Public Health
Karen Nitzkosrsky, Clay County Public Health
Ahmed Makaraan, Somali Community Development Association
Matuor Alier, Moorhead Area Public Schools
Justin Bohrer, Fargo Cass Public Health
Andy Wiese, Sanford Health

Rebecca Kent, Essentia Health
Kory Peterson, City of Horace
Larry Anenson, Fargo Cass Public Health

Chelsey Matter, Blue Cross Blue Shield
Daniel Farnsworth, Fargo-Moorhead
Metropolitan Council of Governments
Daniel Hannaher, Lutheran Immigration and
Refugee Service
Matt Ditmanson, Sanford Health
Erika Spanjer, Fargo Youth Initiative
Erin Prochnow, YWCA Cass Clay
Leeann Felix, Essentia Health
Gerri Leach, Jail Chaplains
Jesse Jahner, Cass County Sheriff's Office
Jenny Mongeau, Clay County Commission
Gladys Kahwa, Sanford Health
Melissa Erickson (Gastro)

Kathy Lonski, F-M Ambulance
Mark Empting, Cass County Sheriff's Office

Sara Wiederholt, Fargo Veterans
Administration

Sanford Fargo Description

Sanford Medical Center Fargo is North Dakota's newest and largest medical center and one of three Sanford medical center campuses in Fargo. It serves as a regional health care hub with 60 percent of patients coming from outside the metro area. It is the region's largest, busiest and only Level I Adult Trauma Center between Minneapolis and Seattle, and Denver and Omaha. Sanford Fargo has a Level II Pediatric Trauma Center, an AirMed transport service covering a three-state area, and it is also the only comprehensive stroke center in the state of North Dakota.

The 284-bed, one-million-square-foot Sanford Medical Center Fargo, which opened in 2017, provides services including emergency/trauma, Family Birth Center, Children's Hospital, brain and spine surgery, heart surgery, interventional cardiology, general surgery and more. Sanford Medical Center Fargo takes care to the next level, combining expertise, state-of-the-art technology, and compassionate patient care. The 27 ORs are the most technologically advanced in the nation, allowing surgeons to consult with specialists anywhere in the world. Digital pathology connects labs at all campuses. Patient rooms are designed around the patient for efficiency, safety and optimal care, not to mention they have the best views in town.

Sanford Medical Center Fargo is a major teaching hospital in partnership with area universities and the University of North Dakota School of Medicine and Health Sciences to provide clinical training for hundreds of medical students, medical residents, nurses and students in numerous health care and non-health care fields. Sanford also offers many activities and programs to attract high school and younger students to the health care field. 22 Community involvement has played an important role in Sanford Medical Center's mission for over 100 years.

Beyond providing medical care, Sanford supports and partners with local and national organizations that know and serve the communities across our region. Together, we work to provide health care awareness, education, prevention, fundraising and research for the health care issues that matter most to our communities. Sanford also supports the region's critical access hospitals so they can continue to provide vital services in their communities, ensuring that all people have access to high quality health care close to home.

Sanford Health is the largest employer in the Fargo metro area with 9,400 Sanford employees in Fargo-Moorhead-West Fargo, including 500 board-certified physicians and 200 advanced practice providers (APPs). It is accredited by The Joint Commission.

CHNA Purpose

The purpose of a community health needs assessment is to develop a global view of the population's health and the prevalence of disease and health issues within our community. Findings from the assessment serve as a catalyst to align expertise and develop a Community Investment/Community Benefit plan of action. There is great intrinsic value in a community health needs assessment when it serves to validate and justify the not-for-profit status and create opportunity to identify and address public health issues from a broad perspective. A community health needs assessment identifies the community's strengths and areas for improvement. A community health needs assessment is critical to a vital Community Investment/Community Benefit Program that builds on community assets, promotes collaboration, improves community health, and promotes innovation and research. A community health needs assessment also serves to validate progress made toward organizational strategies and provides further evidence for retaining our not-for-profit status.

Regulatory Requirements

Federal regulations stipulate that non-profit medical centers conduct a community health needs assessment at least once every three years and prioritize the needs for the purpose of implementation strategy development and submission in accordance with the Internal Revenue Code 501(r)(3).

The Internal Revenue Code 501(r) requires that each hospital must have: (1) conducted a community health needs assessment in the applicable taxable year; (2) adopted an implementation strategy for meeting the community health needs identified in the assessment; and (3) created transparency by making the information widely available.

The regulations stipulate that each medical center take into account input from persons who represent the broad interests of the community. Hospitals are required to seek at least one state, local, tribal or regional government public health department or state Office of Rural Health with knowledge, information or expertise relevant to the health needs of the community.

Non-profit hospitals are required to seek input from members of medically underserved, low income, and minority populations in the community, or organizations serving or representing the interest of such populations, and underserved populations experiencing disparities or at risk of not receiving adequate care as a result of being uninsured or due to geographic, language or financial or other barriers.

The community health needs assessment includes a process to identify community resources that are available to address the assessed needs and to prioritize the needs.

Hospitals are to address each and every assessed need or explain why they are not addressing the needs. Once the needs have been identified and prioritized, hospitals are required to develop an implementation strategy to address the top needs. The strategies are reported on the IRS 990 and a status report must be provided each year on IRS form 990 Schedule H.

Finally, hospitals are to be transparent with the findings and make the written CHNA report available to anyone who asks for the report. Sanford places the CHNA reports and the implementation strategies on the Sanford website. Hospitals are required to keep three cycles of assessments on the web site. The 2022 report will be Sanford's fourth report cycle since the requirements were enacted in 2010.

Sanford extended a good faith effort to engage all of the aforementioned community representatives in the survey process. We worked closely with public health experts throughout the assessment process. Public comments and responses to the community health needs

assessment and the implementation strategies are welcome on the Sanford website or contact can be made at <https://www.sanfordhealth.org/about/community-health-needs-assessment>. No community comments or questions regarding the previous CHNA have been made via the website link or email address.

CHNA Process

Sanford Health, in coordination with public health experts, community leaders, and other health care providers, within the local community and across Sanford's care delivery footprint, developed a multi-faceted assessment program designed to establish multiple pathways for health needs assessment. Sanford Health, Essentia Health, Family HealthCare, Clay County Public Health, and Fargo Cass Public Health, which are referred to as the "Cass-Clay Working Group," coordinated the community survey and stakeholder meeting. Priority health needs for purposes of the individual implementation plans were identified by each organization based upon their current capacities, areas of expertise, alignment with strategic plans, and service areas, among other topics.

Limitations

The findings in this study provide an overall snapshot of behaviors, attitudes, and perceptions of residents living in the community. A good faith effort was made to secure input from a broad base of the community. However, gaps in individual data sources may arise when comparing certain demographic characteristics (i.e., age, gender, income, minority status) with the current population estimates. For example, these gaps may occur due to the difficulty in contacting them through the survey process.

To mitigate limitations, the CHNA evaluates community health from several perspectives; a stakeholder and community survey, meetings with community leaders that have special knowledge and expertise regarding populations, secondary data sources such as the U.S. Census Bureau and County Health Rankings, public comments from previous assessments, and institutional knowledge by Sanford employees locally and across the Sanford enterprise.

Community and Stakeholder Survey

Members of the community were asked a series of questions through an online survey designed in partnership with health experts and public health officials across the Sanford footprint to understand the needs of the community based upon the UW Population Health model. Each respondent was asked to rate community drivers from poor to excellent. Any response other than excellent was offered a follow up opportunity to comment on the reason. Respondents were also asked a series of questions specific to their health care access, health care quality, barriers to care, travel to care, and insurance. The survey was sent to a sample of the Cass County, ND, and Clay County, MN, populations secured through Qualtrics, a qualified vendor. The full set of questions is available in the appendix.

To further promote community involvement the survey was also sent to community stakeholders and elected officials with knowledge and connections amongst medically underserved, low income, or minority populations. Stakeholders were asked to complete the instrument as a resident of the community and forward the survey to their respective populations for greater involvement. The survey was highlighted in a Sanford Health News article (<https://news.sanfordhealth.org/community/health-needs-assessment-survey/>) and promoted

through social media via paid communications. The paid communications yielded 344,300 impressions and 1,150 completed surveys across the system.

Survey data for the local community should be considered directional and best utilized in conjunction with additional data. A total of 1,008 respondents from the CHNA area completed the survey. 6,748 total respondents from across the Sanford footprint completed the survey.

Secondary Data

County Health Rankings is based upon the UW Population Health model and serves as the main secondary data source utilized for the community health needs assessment. Alignment of the survey and secondary data within the UW Population Health model allows for greater connection of the data sets. Population data are sourced to the U.S. Census Bureau. Additional data sources may be used and are sourced within the document.

Health Needs Identification Methodology

The Center for Social Research at North Dakota State University was retained to develop the initial community health needs list for each community and builds upon their involvement during the previous cycle. The following methodology was used to develop the significant health needs presented later in the report:

- Survey data was stratified into representative groups based upon population: large urban communities, medium sized communities, and rural communities. The three groups were analyzed separately. Fargo is included with Sioux Falls SD and Bismarck ND.
- To identify community health care needs, each community's score by question was compared to the average stratified composite of the comparative group. For example, if the composite stratified system-wide average score is 4 and an individual community's average response was 2.5, which would suggest an issue of concern and a potential community health care need to be highlighted in the summary findings.
- Upon determination of a potential strength or need, County Health Rankings (<https://www.countyhealthrankings.org/>) and responses from open-ended questions provided additional insights into the drivers of the respective needs.
- A similar methodology was also used to provide additional insights into findings from County Health Rankings data with relevant health needs highlighted in the survey findings.
- Health needs identified through either the survey or County Health Rankings data but not both were also included in the findings.

Community Asset Mapping

Asset mapping was conducted to find the community resources available to address the assessed needs. Each unmet need was researched to determine what resources were available to address the needs. Once gaps were determined, the prioritization exercise followed with key stakeholder groups determining the top needs.

Community Stakeholder Meetings

The Cass-Clay Working Group held a joint meeting in which community stakeholders were invited to attend a presentation of the findings of the CHNA research. Facilitated discussion commenced with the participants divided into small groups. Each participant was asked to consider the needs identified through the survey that should be further developed into

implementation strategies. Health needs identified during the previous cycle but not raised through the survey or County Health Rankings were also considered. The meeting served to inform the group of the findings but also served as a catalyst to drive collaboration.

The facilitated discussion sought to inform on several aspects:

- What are the biggest challenges currently with these needs in the community?
- Does the community have gaps in services, access, outreach, etc.?
- OPPORTUNITIES – where can we have greatest impact in addressing these needs?
- Which are most urgent in nature?
- Is there work being done on these needs?
- What are the resources currently not utilized within the community that could address this topic?
- Which fall within the purview of healthcare system and which do not? Can the non-healthcare needs be shared with other entities or organizations?
- Is there anything you consider an urgent need that we have not discussed?

Each group was asked to submit their top three priorities at the end of the meeting based upon the survey data and stakeholder meeting discussions. Representatives for the Cass-Clay Working Group subsequently developed a top 10 list of health needs based upon the primary and secondary data and input from the community stakeholder meeting. Priority health needs for purposes of the individual implementation plans were identified by each organization based upon their current capacities, areas of expertise, alignment with strategic plans, and service areas, among other topics.

Community Definition:

Cass and Clay Counties, North Dakota are included in the data analysis and represent a majority of the volumes to Sanford Fargo medical centers. No population was excluded from the process.

COMMUNITY HEALTH NEEDS ASSESSMENT FINDINGS

Community Health Summary

CHNA respondents were asked to rate various community health issues and their personal health and wellness on the following 1 to 5 scale: 1= poor, 2= fair, 3= good, 4= very good, 5= excellent. Overall, perceptions among CHNA respondents in the Fargo area regarding the following community health issues were positive. Average scores for access to daily transportation (average score=3.07), long-term nursing care and senior housing quality (average score=3.37), child care and preschool quality (average score=3.51), community safety (average score=3.60), employment and economic opportunities (average score=3.60), access to healthy foods (average score=3.61), access to exercise opportunities (average score=3.67), health care quality (average score=3.75), and environmental health (average score=3.89) in the Fargo market were all above 3.00. However, with the exception of transportation, long-term care, and child care, average scores for CHNA respondents in the Fargo area for each of these community health issues was lower than the comparison group average.

When asked about their personal health, CHNA respondents in the Fargo area rated their current health and wellness as good (average score=3.28) and their current ability to access health care services as fairly good (average score=3.81). However, both scores were lower than the comparison group average. Despite lower rankings when compared to similar-sized markets, it is important to note that average scores of CHNA respondents in all three markets were very similar.

CHR data indicate that Cass County is among the healthiest counties in North Dakota and Clay County ranks in the upper-middle range of Minnesota counties in terms of overall health. However, the following areas of concern were identified for further discussion (in no particular order).

Identified Significant Health Needs

Access to Affordable Health Care

Access to affordable, quality health care is important to physical, social, and mental health. Health insurance, local care options, and a usual source of care help to ensure access to health care. Having access to care allows individuals to enter the health care system, find care easily and locally, pay for care, and get their health needs met. NDSU reported health care accessibility and cost as two separate health needs. The Cass-Clay Working Group determined that the two topics are most appropriately addressed as a combined topic for purposes of the local CHNA process.

When CHNA respondents in the Fargo area were asked about the most important health care issues impacting their community, the cost of health care was their top concern (higher than COVID-19 and general access concerns). In addition, when respondents were asked about their biggest health care concerns for themselves and their family (concerns they face on a regular basis), cost and the ability to afford needed health care was their top health care concern. Regarding routine checkups, 13 percent of CHNA respondents in the Fargo area had not been to a physician or provider for a routine checkup in the past year (which is the lowest percentage when compared to similar-sized markets served by Sanford Health). When asked why, the third leading concern was cost and inability to afford care (18%), behind COVID-19 concerns (40%) and not needing to see a doctor (33%). In addition, 13 percent of CHNA respondents in the Fargo area indicated that they or a family member needed medical care in the past year but did not receive it. When asked why, the main reason was due to cost and inability to pay for health care services (59%), followed by COVID-19 concerns (33%) and no health insurance (29%).

According to CHR, approximately 7 percent of people in the Fargo area are uninsured, a rate

which is slightly lower than the average for similar markets served by Sanford Health.

While CHNA respondents in the Fargo area rated their ability to access health care as fairly good (average score=3.81), the score was slightly lower than the comparison group average. One in five CHNA respondents in the Fargo area reported traveling outside of their community to receive health care services in the past three years (22%). When asked why, most of those who traveled for care indicated that they needed specialty care or the needed services were not available locally (60%), followed by 36 percent of respondents who traveled for better or higher quality care.

One in six CHNA respondents in the Fargo area indicated they do not currently have a primary care physician (16%), which is the highest percentage among similar markets. When asked which health care services they would like to see offered or improved in their community, approximately one in four CHNA respondents in the Fargo area said walk-in or urgent care (29%), dental care (28%), and family medicine or primary care (23%). According to CHR, the Fargo area has one primary care physician for every 1,272 people (which is the highest ratio among similar-sized markets served by Sanford Health) and one dentist for every 1,375 people (which is the lowest ratio among similar markets).

During the community stakeholder meeting participants brought up increasing access to healthcare access as a top concern several times. Although participants were pleasantly surprised by the healthcare access numbers. Meeting participants discussed cultural competency of health care and support resources for vulnerable and underserved as areas where health care access could be improved. Cost of care, lack of financial assistance resources, health equity, health literacy, lack of knowledge of available resources, and lack of mobile care units were brought up as contributing factors to poor healthcare access. Participants identified improving primary care and specialty services as an area that systems could have a meaningful impact.

Physical Activity and Nutrition

The environments where people live, learn, work, and play affect access to healthy food and opportunities for physical activity which, along with genetic factors and personal choices, shape the health and the risk of being overweight and obese.

After cost and the ability to afford needed health care, chronic health issues were the most common health care concern that CHNA respondents and their families in the Fargo area face on a regular basis. The most commonly cited chronic health concerns involved overweight, obesity, and diabetes. Diabetes is an important marker for a range of health behaviors. CHR data indicate that one in twelve adults in the Fargo area has diabetes (8%) and nearly one in three adults has obesity (31%), both of which are about average for similar-sized market areas served by Sanford.

CHR data also indicate that 19 percent of individuals in the Fargo market are physically inactive (which is similar to the comparison group average) and 7 percent are considered food insecure and do not have a reliable source of food (which is also similar to the comparison group average). While CHNA respondents in the Fargo area rated access to healthy foods between good and very good (average score=3.61), the score was slightly lower than the comparison group average. When the 14 percent of CHNA respondents in the Fargo area who rated access to healthy foods as poor or fair were asked why they did so, a common theme was that access to healthy food is dependent on a person's income and access to transportation. Respondents added that a local corner convenience store (which typically offers processed foods and less healthy options) is often much more accessible and less expensive than a larger grocery store.

During the facilitated discussion nutrition was discussed in numerous small groups, including food insecurity among women and children. Increasing access to healthy food options in the community and addressing hunger needs was identified as an opportunity, especially with a growing concern for obesity in the wake of the COVID-19 pandemic.

Mental Health

Mental health includes our emotional, psychological, and social well-being and affects how we think, feel, and act. It also helps determine how we handle stress, relate to others, and make choices. Mental health is important at every stage of life, from childhood and adolescence through adulthood².

When CHNA respondents in the Fargo area were asked which health care services they would like to see offered or improved in their community, most said behavioral and mental health services (70%) followed by addiction treatment (51%). According to CHR, adults in the Fargo market average about 3.7 mentally unhealthy days each month and 12 percent of adults average at least 14 days of mental distress per month. One of the most important measures of mental health within a community is suicide. CHR data indicate that there are 16 suicides for every 100,000 people in the Fargo area, a rate similar to those in the Bismarck and Sioux Falls market areas served by Sanford Health.

According to CHR, the Fargo area has one mental health provider for every 364 people (which is the lowest ratio among similar-sized markets served by Sanford Health).

During the stakeholder meeting mental/behavioral health arose as a consistent area of opportunity among participants. Meeting participants were not surprised that mental health came up as one of the top health needs. Mental/behavioral health needs have been a constant concern in the community, and it has worsened due to COVID-19. The sheriff's department also mentioned seeing a need for increased mental health services.

During the stakeholder meeting, groups raised a concern about the need to address the stigma surrounding mental health. Non-traditional care delivery methods, such as telehealth were noted to be effective at treating mental health. The mental health needs of the pediatric/adolescent community were particularly a focus of community stakeholders.

Substance use disorder/addiction

Although not noted as a health need through the survey process, the community stakeholder meeting participants raised substance abuse and addiction in numerous groups. Substance abuse is a known community issue and the sheriff’s department reported that it has been getting worse recently. Participants expressed concern for some community members prioritizing drugs over essential things like food. They also mentioned that substance abuse has been increasing due to COVID-19. Participants were particularly concerned about substance abuse in the community’s youth. Participants expressed a concern that current interventions in the community may be insufficient to address the topic. Access to nontraditional services to treat substance abuse was mentioned as a valuable resource to treat substance use disorder/addiction.

Senior Housing and Long-Term Care

Safe, quality, affordable housing is fundamental to a healthy life. Healthy homes can improve lives and provide a foundation of health for individuals and families, but unhealthy homes can just as easily undermine quality of life and even cause poor or substandard health. A safe, quality, and affordable home is paramount to healthy aging³.

CHNA respondents in the Fargo area rated the quality of long-term care, nursing homes, and senior housing as good (average score=3.37); however, nearly one in five respondents rated the quality as poor or fair (18%). When respondents who rated the quality of long-term care, nursing homes, and senior housing as poor or fair were asked why they did so, responses referenced an

³ The Urban Institute, Urban Wire: Aging. Available at <https://www.urban.org/urban-wire/topic/aging>

overall lack of affordable housing for seniors. In regard to long-term care specifically, responses focused on poorly treated residents by overworked staff receiving low wages. When CHNA survey respondents in the Fargo area were asked which health care services they would like to see offered or improved in their community, one in five respondents said long-term care (22%).

Senior housing and long-term care, although important, was not included by participants in the stakeholder meeting as a priority facing the community compared to others discussed. Further exploration of aging-in-place resources may assist efforts to decrease strains on the current system while allowing seniors to remain in their home or less costly care location.

Public Transportation

Transportation systems help ensure that people can reach everyday destinations, such as jobs, schools, healthy food outlets, and health care facilities, safely and reliably. Public transportation services play an important role for people who are unable to drive, people without access to personal vehicles, children, individuals with disabilities, and older adults⁴.

CHNA respondents in the Fargo area rated community access to daily transportation as good (average score=3.07); however, 30 percent of respondents rated access to daily transportation as poor or fair – and the average score was the lowest rating among community health issues, with the exception of affordable housing. When respondents who rated community access to daily transportation as poor or fair were asked why they did so, responses acknowledged a reasonable bus system in the core Fargo metro area, however, lines do not reach all neighborhoods or business districts and employment locations. Respondents indicated that public transportation options outside the metro are even more scarce, if available.

⁴ Centers for Disease Control and Prevention, Office of the Associate Director for Policy and Strategy, Population Health and Healthcare Office. Available at <https://www.cdc.gov/policy/hst/hi5/publictransportation/index.html>.

Public transportation was discussed during the community health needs assessment stakeholder meeting. Participants mentioned that the transportation needs do not meet the size or growth of the community. Transportation needs are especially high for those with mental health issues and may be contributing adversely to individual outcomes. While the current transportation service area was noted in the survey results, participants also indicated scheduling issues have a negative economic impact for those who cannot make it to work due to limited transportation.

Affordable Housing, Employment, Economic Development

There is a strong and growing evidence base linking stable and affordable housing to health. As housing costs have outpaced local incomes, households not only struggle to acquire and maintain adequate shelter, but also face difficult trade-offs in meeting other basic needs. When the majority of a paycheck goes toward the rent or mortgage, it can be difficult to afford doctor visits, healthy foods, utility bills, and reliable transportation to work or school. This can, in turn, lead to increased stress levels and emotional strain.

CHNA respondents in the Fargo area rated the availability of affordable housing in their community as less than good (average score=2.58) and lower than any other community health issue. When asked to explain why they rated community access to affordable housing the way they did, CHNA respondents suggested that housing prices in general are inflated and continue to rise at a pace that exceeds any rise in wages for middle- and low-income individuals. Regarding affordable housing programs that offer assistance, respondents cited long wait lists, difficulty navigating the process, and substandard units when available.

CHR data suggest that 13 percent of households in the Fargo area have severe housing problems (i.e., overcrowded, high housing costs, lack of kitchen facilities, or lack of plumbing facilities) and 12 percent of households spend at least 50 percent of their household income on housing costs – both rates are higher than those in the Bismarck and Sioux Falls markets.

Although the survey data raised areas of concern amongst affordable housing specifically, meeting participants tied affordable housing, employment, and economic development together. Housing needs were a focus of discussion with most commonly cited reasons related to employment factors or economic development. It was mentioned that housing costs have been rising recently and that job availability for the vulnerable is exacerbated by a lack of access to good paying jobs. Participants noted that housing availability in the community does not meet the current needs. Ideas on how to address the housing needs focused on increasing the employment and economic development of the area. Participants in the stakeholder meeting brought up increasing employment and economic development multiple times.

Diversity, Inclusion, Health Equity

Although not noted as a health need through the survey process, diversity, inclusion, and health equity arose as a discussion point multiple times by separate breakout groups. Interpreters and reinforcement of cultural competency was mentioned as an opportunity to improve health care accessibility and care delivery. Health literacy was another area of improvement with groups noting that it adversely impacted access to care for vulnerable populations, including the American Indian population,

Childcare

Although not noted as a need through the survey process, the community stakeholder meeting, a majority of groups added childcare as an area of a concern. Access to childcare centered primarily on the cost of childcare when available with some raising concerns about quality. Meeting participants were also concerned with children's health and promoting available resources and the opportunity that childcare could play in improving children's health.

Health Literacy and Navigation

The survey process did not specifically identify health literacy and care navigation as a community need but it was raised as an opportunity among several of the small groups at the stakeholder meeting. Participants expressed a need for improving education on health care and affordability resources, health care navigation, and general wellness education. Resources are available to address these issues although some in the community may not know what is available or how to access the resources. This issue was discussed much along the lines of health equity, with community members citing a specific opportunity in medically vulnerable populations.

Sanford Area of Focus

The health needs identified through the survey and secondary research process above were brought forward as topics of discussion at the local stakeholder meeting, which brought together a range of community leaders with knowledge of medically underserved, low income, or minority populations. Members of Cass-Clay Working Group were also present. List of attendees thanked is in the introduction.

Stakeholders discussed the health needs, causes, and provided additional insight for their local populations and community resources. Participants were also encouraged to offer additional needs that may not have been raised during the research process.

IMPLEMENTATION PLAN

Priority 1: Access to Affordable Health Care

Sanford Health is positioned locally to have a positive impact on Health Care Access within the community. This effort will focus on two primary goals – to expand healthcare access and support services and expanded platform to access Primary Care Services, areas of focus identified in the stakeholder meeting.

Current activities

Sanford is addressing the need by including Access to Healthcare as a priority focus area for the 2022-2024 implementation plan. We launched Home Based Primary Care in 2021. The goal is to provide quality medical care at home to patients who have difficulty accessing medical care because of physical disability or dementias. An interdisciplinary team sees the patient in their home and consists of social worker, care manager, LPN and Physician/APP.

Family Medicine Resident Clinic now sees patients in local shelters, YWCA, Headstart and will begin in one of the Fargo schools in late fall 2021. The goal of these outreach sites is to improve access to care for these patients.

Sanford will be expanding primary care clinic locations by adding a Horace Clinic in late 2022. Using telehealth, we have expanded our access in clinics for patients unable to travel to the clinic.

Projected Impact

Upon completion of the action plan, the Community would see that patients will have greater ease to access Primary Care Providers for virtual or in-person visits, home visits and increased expanded hours. Patients may experience less frequent utilization of emergency care, which is often more expensive than preventative and screening services.

Goal 1: Expand healthcare access and support resources for vulnerable and underserved populations

Actions/Tactics	Measurable Outcomes & Timeline	Dedicated Resources	Leadership	Note any community partnerships and collaborations – if applicable
Expand Home Based Primary Care	Number of patients served Q4 2022, increased screenings, emergency department avoidance.	Emily Gard Darin Lang, MD Kirsten Juhl, MD	Kathryn Norby	
Expand Family Medicine services (checkups and vaccination clinics) provided by our Residency Program in shelters, YWCA, Head Start and Fargo Public School	Patients served, vaccination rates Q1 2022	Emily Gard Lara Lunde, MD Amie Haugo, MD	Kathryn Norby	Shelters, YWCA, Head Start, Fargo Public Schools

Goal 2: Expand platform and access to Primary Care Services

Actions/Tactics	Measurable Outcomes & Timeline	Dedicated Resources	Leadership	Note any community partnerships and collaborations – if applicable
Add Primary Care Clinic location in Horace, ND	Improved patient satisfaction Q4 2022	Andrew Larson	Kathryn Norby	
Increase non-traditional hours in Primary Care Clinics (virtual or in-person visits)	Improved patient satisfaction Q3 2022, increased patient utilization.	Andrew Larson Emily Gard	Kathryn Norby	
Make virtual visits (telehealth appointments) available for all Primary Care Providers	Provider schedules modified; Improved patient satisfaction Q2 2022, increased utilization of telehealth	Andrew Larson Emily Gard	Kathryn Norby	
Recruitment – providers and nursing	Additional providers and nurses	HR partners Physician Recruitment	Kathryn Norby	

Priority 2: Mental Health / Behavioral Health and Substance Abuse

Sanford Health is positioned locally to have a positive impact on Mental Health / Behavioral Health and Substance Abuse within the community. This effort will focus on three primary goals – Recruitment and access to mental health providers, development of a community strategy for mental health promotion, and substance abuse.

Current activities

Mental Health: Sanford Health continues to recruit providers to improve access to mental health services. We have expanded school partnerships to increase workforce for our mental health providers. A mental health consult team started in 2021 with a goal of embedding therapists on hospital units.

Using telehealth, we have expanded our access in clinics for patients unable to travel to the clinic. Sanford Health is hosting Community Mental Health Collaboration meetings with our community partners with a goal of improving the mental health provided in the community, to serve those in a behavioral health crisis.

A grant has been submitted for our Community Mental Health Collaboration project, with notice of award timeframe in December 2021. We currently screen for depression at clinic visits and have Integrated Health Therapists embedded in all of the primary care clinics.

Substance Abuse: Patients identified by their Primary Care Provider as having an opioid use disorder are able to receive treatment with our Suboxone Clinic and MAT community partners. Patients are seen by our Integrative Health Therapists for a comprehensive behavioral health evaluation, followed by a referral to the appropriate behavioral health provider (e.g. Addiction treatment, therapy, psychiatry). The patient then is scheduled with one of our four certified physicians who prescribe Suboxone for induction.

Sanford Health’s collaboration with a Fargo-based peer-to-peer substance abuse program provider, F5, began in 2019. The collaboration remains strong and the F5 team begin counseling sessions within our hospital for patients with drug/alcohol addiction.

Sanford supports many community partners to address the substance abuse in our community. Partnerships include Fargo Cass Public Health (Mobile Crisis Unit) and Recovery Reinvented.

Projected Impact

Upon completion of this action plan, the community would have better access to and utilization of mental health and substance abuse services due to services being provided at the right time and right place.

Goal 1: Recruit providers and increase access to care

Actions/Tactics	Measurable Outcomes & Timeline	Dedicated Resources	Leadership	Note any community partnerships and collaborations – if applicable
School partnerships for Master’s Level Therapists (LAPC/MSW) - Recruitment	Number of students placed number that join Sanford Q1 2022, increase appointment availability.	Emily Gard Behavioral Health Staff	Kathryn Norby	
Collaborative Care – improve access	Number of patients in program, decrease in wait time to access BH, decrease in ED visits Q1 2023	Laurie Carey Jennifer Faul Andrew Larson Dr. Kohoutek Dr. Burgard	Kathryn Norby	
Virtual Visits (telehealth appointments)	Number of patients seen with	Emily Gard Andrew Larson	Kathryn Norby	

	telehealth; types of visits; Patient Satisfaction Q1 2022			
Mental Health Consult Team – therapists embedded in hospital	Number of patients seen; outcomes; Q3 2022	Emily Gard Heather Carr, LPC	Kathryn Norby	

Goal 2: Develop community strategy for mental health promotion

Actions/Tactics	Measurable Outcomes & Timeline	Dedicated Resources	Leadership	Note any community partnerships and collaborations – if applicable
Community Mental Health Collaboration (Grant)	Patients served, collaborative calls with BH services, reduced ambulance and ED admissions Q1 2022	Community Paramedics	Kathryn Norby Sherm Syverson	First Link SouthEast Law Enforcement Leaders Solutions
Depression Screening	Completion of depression screening at visits; depression remission Q1 2022	Emily Gard Andrew Larson Laurel Carey	Kathryn Norby	

Goal 3: Decrease substance Abuse

Actions/Tactics	Measurable Outcomes & Timeline	Dedicated Resources	Leadership	Note any community partnerships and collaborations – if applicable
Expand Suboxone Clinic	Number of patients served, prescribing physicians; incorporate into resident clinics Q4 2022	Andrew Larson Emily Gard	Kathryn Norby	
F5 Partnership – peer coaching in hospital	Number of patients served Q1 2022	Kelsey DeVlieger	Darla Dobberstein	F5
Assess and refer to medical detox or the withdrawal management unit	Number of patients referred for medical detox, number referred to WMU	ED Staff Case Management	Sherm Syverson	Cass & Clay county public health Withdrawal Management Unit (Detox)

Needs Not Addressed

Needs identified during the CHNA process—as referenced in the Community Health Needs Assessment Report above—that are not addressed as a significant need for the purpose of this process:

Physical Activity and Nutrition: is not included in the Implementation Plan as other organizations, including those listed in the asset map are addressing the need. As such, it was determined to be a lower priority compared to other areas for purposes of the Community Health Needs Assessment. Sanford has and continues to address the nutrition need in the community. A food pantry was established in partnership with Great Plains Food Bank at our Southwest Children’s Clinic in 2021. Patients and families are screened for food insecurity at every appointment in both primary and urgent care. Food and other products such as diapers, wipes and feminine products are provided to any family that identifies a need.

Sanford has multiple community partnerships to promote physical activity and nutrition such as Fargo Park District, American Gold Gymnastics and BIO Girls. These partnerships provide scholarship dollars for youth to participate in activities, encouragement and education for youth’s health promotion.

Senior Housing and Long-Term Care: Senior housing and Long-Term Care is not included in the Implementation Plan as it was determined this need is a lower priority compared to the other areas for purposes of the Community Health Needs Assessment. Sanford Health works collaboratively with many of the long-term care facilities providing medical oversight as required by regulation and mental health services from our Internal Medicine, Family Medicine and Psychiatry departments.

Sanford will share results of the Community Health Needs Assessment with The Evangelical Good Samaritan Society and other long-term care providers, as requested.

Public Transportation: Public Transportation is not included in the Implementation Plan it was determined this need is a lower priority compared to other areas. Additionally, other organizations, including those listed in the asset map, are addressing the need. Sanford Health is addressing the need by partnering with Handi-Wheels and United Way Cass Clay, both which support improved access to Public Transportation. Information from the Community Health Needs Assessment process will be shared with stakeholders addressing the issue, as appropriate.

Affordable Housing, Employment, Economic Development: Affordable Housing, Employment, Economic Development is not included in the Implementation Plan as it was determined this need is a lower priority compared to other areas. Additionally, other organizations, including those listed in the asset map, are addressing the need. Sanford Health partners with Chamber of Commerce, YWCA and the Greater Fargo Moorhead Economic Development Corp. These partnerships support focused efforts on economic development, workforce and housing needs. Information from the Community Health Needs Assessment process will be shared with stakeholders addressing the issue, as appropriate.

Diversity, Inclusion, Health Equity: Diversity, equity and inclusion is not a new focus at Sanford Health but it's one the organization is committing to strengthen in order to foster a more inclusive culture. Natasha Smith joined the Sanford family in March 2021 as our first Head of Diversity, Equity and Inclusion. Natasha is working to form an enterprise strategic plan to strengthen our existing commitment and build new initiatives to support diversity, equity and inclusion in everything we do – in all markets for our employees and patients. Diversity, Equity, and Inclusion Consultants are in the process of being hired in order to have a concentrated focus and presence within specific markets. We are taking a wide lens approach to strategic planning. Several providers will receive the preferred providership designation for the LGBTQ+ demographic by year-end. Key stakeholders and the most recent employee engagement survey results are being leveraged to define and incorporate viable strategic outcomes. We continue to work on ensuring representation, creating awareness, driving that inclusivity and feeling of belonging in the workplace and for patient care. Although the need is a focus for Sanford, it is not included in the Implementation Plan as the stakeholder group determined this need is a lower priority compared to other areas for purposes of the Community Health Needs Assessment.

Childcare: Childcare is not included in the Implementation Plan as other organizations, including those listed in the asset map are addressing the need. As such, it was determined to be a lower priority compared to other areas for purposes of the Community Health Needs Assessment. Sanford Health partners with YMCA, YWCA, Youthworks and Village Family Service Center to improve childcare support and accessibility and will share Community Health Needs Assessment finds with stakeholders, as needed.

Health Literacy and Navigation: Health Literacy and Navigation is not included in the Implementation Plan it was determined this need is a lower priority compared to other areas for purposes of the Community Health Needs Assessment. Sanford Health recognizes the importance of improving education about healthcare resources and is addressing the needs by

offering resources for this purpose, including, but not limited to, care navigation services in numerous service lines and “Patient Learning” resources available online at <https://www.sanfordhealth.org/patients-and-visitors>. The webpage includes link to patient education resources, a health library, and a video library. The page also links to information on billing, advanced care planning, Sanford’s financial assistance policy and other resources, such as advanced care planning. Information is further available in care delivery settings. Sanford will continue to see opportunities to make patients and the larger community aware of education opportunities.

EVALUATION OF 2019-2021 CHNA

Goal 1: Healthcare Access

In a partnership with a Sanford primary care clinic in West Fargo, a collaborative care model was designed in 2019 with hopes of expansion to all clinic locations in the next 3-5 years. The model allows primary care physicians and integrated health therapists embedded with primary care clinics to evaluate patients and quickly consult with psychology or psychiatry about plans of care. The goal of the program is to provide a consultative model that delivers the right level of care to the right patient at the right time.

Sanford has successfully recruited a number of providers to improve access for the local community. In 2019, Sanford added new behavioral health providers, including one APP in adult psychiatry, five MD adult psychiatrists, one PhD psychologist, and four Integrated Health Therapists (LPCC, MSW, LMSW, LICSW). In 2020, Sanford further expanded the behavioral health providers by adding a MD adult psychiatrist, a PhD child psychologist, an APP in adult psychiatry, and Six Integrated Health Therapists.

During the summer/fall of 2019, Sanford Health began collaborating with Fargo Public Schools and Moorhead Public Schools to research and develop a tele-behavioral health program that could be expanded across the state of North Dakota. The model of care allows children to see behavioral health providers virtually without being taken out of the school environment. In turn, the behavioral health professional does not need to utilize valuable time to travel to and from the school. This expands hours of availability by reducing down-time for the student and healthcare provider. The Tele-behavioral health pilot project in schools launched in spring of 2020. After initial enrollment of two children, the schools in Fargo/Moorhead were shut down and additional enrollment of children was put on hold. The enrolled children were able to complete the program in their homes. The pilot project re-launched in fall of 2020 with 20 kids enrolled. Due to hybrid/virtual learning in schools, the pilot remained on hold until early 2021.

Sanford Fargo also began efforts to increase walk in hours and weekend hours but due to COVID those efforts have been put on hold.

In 2020, Sanford primary care added access to clinics by recruiting additional Family Medicine and Internal Medicine providers including: 1 APP and 4 MD’s in family medicine, and 1 APP and 1 MD in internal medicine.

In 2019, the Advanced Practice Fellowship was launched to promote role expansion of Advanced Practice Providers to improve access. The program is a one-year training program for nurse practitioners and physician assistants who have completed their primary training program and are licensed providers. We offer rotations in primary and specialty care for a year. Rural community options are included. Fellows are assigned a preceptor and they see 4-6 patients per day. The fellows practice within primary care clinics to learn the collaborative care practice model

with our primary care physicians. However, the fellowship was delayed from August 2020 to January 2021 because of COVID.

A full-time behavioral health Advanced Practice RN (APRN) was hired in 2019 for emergency department coverage. This has increased the level of care and allowed for faster evaluations and proper placement of people suffering mental health crises.

We opened a Post Hospital transition clinic 6 days a week for medically complex patients that were discharged from the hospital. With care management, social work, integrated health therapists and pharmacists. Now patients could be seen very soon after their discharge.

The Pediatric Mental Health Care Access Program is a Sanford project that focuses on collaborative care opportunities for pediatric medical providers to enhance treatment of pediatric mental health difficulties in North Dakota. In this program, primary care providers receive training, mental health education, and expert consultation on treating mental health conditions in children. The program collaborates with the University of North Dakota School of Medicine and Health Sciences and the North Dakota Department of Health. It's funded by the Health Resource Services Administration.

Sanford has developed materials to educate patients (decision path) on primary care and walk-in urgent care clinic options. Signage posted indicating where to go for severity of symptoms in all exam rooms, elevators as well main corridors. Scheduling and triage nurses provide real-time education for out patient's as to where to receive care at most appropriate setting. Patient education in our clinics includes educational brochures with picture pages of their primary care team and how to access care. In 2019 demonstrated a shift of patient visits from urgent care to neighborhood clinics, which shows patients are receiving care at the right place at the right time.

Despite a growing community, our ER volumes have reduced and visits have shifted to our neighborhood clinics. There was a 4% decrease in Urgent Care utilization (83,823 visits in 2018 to 80,459 in 2019). During the same period, we saw a 25% increase in our primary care walk-in visit utilization from 11,452 in 2018 to 14,677 in 2019.

Goal 2: Mental Health

Sanford Health began collaborating with a F5, a Fargo-based peer-to-peer substance abuse support program provider in 2019. The program began in August 2020 and is offered twice per week to inpatients detoxing from alcohol and other substances. Patients are encouraged to meet in a group setting. Outcomes that are measured include re-admission rates, emergency visits, and EMS encounters.

In September 2019, Sanford Health implemented the use of a substance abuse and chemical dependency screening tool for pediatric trauma patients called SBIRT. Screening, Brief Intervention, and Referral to Treatment (SBIRT) is an evidence-based practice used to identify, reduce and prevent problematic use, abuse and dependence on alcohol and illicit drugs. Patients at risk are provided with resources to address their specific at-risk behavior while they receive care for their traumatic injuries.

At our Suboxone clinic, we are working towards co-prescribing Narcan with any opioid prescription. This is the next step in the effort to decrease deaths by overdose in our community.

IHT services have increased in our clinics. Sanford Fargo now has 10 IHTs in primary care clinics, increasing from 9 in 2019. On average IHTs see five patients per day to assess and refer to medical detox or the withdrawal management unit.

Sanford Fargo increased the number of medication assisted treatment certified providers in 2019. Five physicians received waivers to prescribe suboxone after completing an 8-hour training course. The program launched in early 2020 and five participants went through the treatment. Outcomes set to be measured include re-admission rates, number of emergency department visits, EMS encounters and rate of peer-to-peer group attendance (goal 50% attendance) for a six-month period beginning July 2020.

Patient Health Questionnaires are used to assess patients and refer them to an IHT if needed. This process was disrupted due to COVID. Mental Health First Aid Training was paused in 2020 due to COVID. It will be replaced with BeHeard which has the capacity to be delivered both in-person and virtually. PHQ's are deployed by the panel assistant. Primary care physician receives elevated PHQ and places appropriate referrals to IHT for intervention. IHT available to see patient in real-time to address clinical needs. Patients with a PHQ-9 score >9 work with IHT and other providers to reduce the severity of depression. PHQs are also in place to determine the patient's risk of suicide. PHQ is given to patient based on outlined criteria. If positive, Columbia Suicide Severity Rating Scale is administered by nursing. Results elevated to physician/APP for disposition of treatment interventions.

CONTACT INFORMATION

The Community Health Needs Assessment, Implementation Plan, and survey data are available online at <https://www.sanfordhealth.org/about/community-health-needs-assessment>. The website includes current and historical reports.

Anyone wishing to receive a free printed copy, obtain information on any topic brought forth in the report, or offer public comments for consideration during the implementation plan or future Community Health Needs Assessment work, please contact us at Community.Benefits.Sanford@SanfordHealth.org or visit <https://www.sanfordhealth.org/contact-us>.

APPENDIX

Survey Responses

Survey responses are available through an online dashboard at <https://www.sanfordhealth.org/about/community-health-needs-assessment>

Expanded Demographics *(individual values located in table below)*

Clay County Minnesota had a 2019 population of 64,222, with a growth rate of 8.9% from 2010-2019 it exceeded Minnesota's 6.3% growth in the same time period. In addition, Clay County has a slightly lower population density than its home state. However, Cass County, North Dakota had a population of 181,923 in 2019 accounting for almost 24% of North Dakota's total. Cass County grew 21.5% from 2010-2019, surpassing its home state's 13.3% growth rate. Cass County has a population density nearly 8.8 times higher than North Dakota as a whole. Both Counties have a lower population proportion over the age of 65 than both states.

The median value of a home in Clay County is less than its state median at 197,100, conversely the median value of a home in Cass County is more than its state at 223,800. Computer ownership and internet follows a similar trend with Cass County surpassing ND, and Clay County coming short of MN. Cass County has a Secondary education rate of 40.2% surpassing all groups in the comparison. Both counties have labor force participation rates over 70 percent which is higher than either of the state's overall labor force participation rate. Both counties and ND have a median income around \$65,000 while MN's median income surpasses \$71,000.
